

Free Pilot Program

Take your Business Asset tracking to the next level

When it comes to your business assets, keeping track of what you have, where you have it – all while ensuring your data in Workday is accurate – can be quite a challenge.

mobilePLUS can help.

As a Workday Emerging Partner, we're always looking to enhance how mobilePLUS can complement your Workday solution and streamline your business asset audits and inventories.

We built mobilePLUS and our integration to Workday to ensure a seamless connection between your physical business asset and its data in your Workday solution.

Give mobilePLUS a Test Drive

You can research options, explore product functionality and sit through demos. But it still can be hard to envision how a solution may work in your environment.

Let us show you.

This Pilot Program was designed for you to give mobilePLUS a solid Test Drive - in-house.

The mobilePLUS Pilot Program provides you with the mobilePLUS software, ramp-up services and expertise. You provide mobile devices, asset tags, your Workday Tenant, and 60 days.

Together, we'll show you how mobilePLUS can expand the benefits of your Workday investment - and take your business asset tracking to the next level.

Objectives

- Provide a functional understanding of mobilePLUS with a production-capable solution
- Enable your team to easily tailor the application to your business assets use case
- Demonstrate the ease of use for administrators and users
- Establish a project approach for full deployment and support – with minimal investment and time
- Generate results and asset data to assist in a cost/benefit analysis of the solution
- Showcase the limited need for IT or your internal Workday solution team resources to implement and sustain the mobilePLUS
- Engage the Pilot Program components, including training, consulting services & support

mobile⁺

BY HL GROUP
